AI Agents Fundamentals

Robin Chriqui

Agentic AI & Data Science Engineer @ KARL STORZ
Israel

Experience

KARL STORZ

4 years 9 months

Agentic AI & Data Science Engineer
April 2026 - Present (5 months)

Data Scientist

December 2021 - April 2026 (4 years 5 months)

Working on applied AI systems combining Generative AI, multi-agent architectures and data science for intelligent applications.

- Designed real-time multi-agent systems orchestrating multiple LLMs for complex reasoning and user interaction
- Built RAG pipelines integrating internal knowledge bases and structured datasets
- Performed LLM fine-tuning and evaluation to improve task-specific performance
- Developed machine learning models for prediction, classification and clustering on structured datasets
- Benchmarked frontier and open-source models to optimize accuracy, latency and cost

Tech: Python | PyTorch | LLMs | RAG | Multi-agent systems | HuggingFace |
Machine Learning

OpenClassrooms

Mentor Data Scientist

May 2021 - December 2023 (2 years 8 months)

IBM

Data Scientist

June 2020 - January 2021 (8 months)

Givatayim

Collaborated with a team of Data Scientists to develop machine learning and NLP solutions for insurance risk analysis and document classification.

- Built predictive models for insurance risk evaluation using ensemble methods, improving decision-making and achieving an F1 score of 88%
- Designed and optimized transformer-based NLP models in TensorFlow (e.g., Universal Sentence Encoder) to classify complex text requirements
- Developed data preprocessing and feature engineering pipelines to improve model performance and robustness
- Worked closely with cross-functional teams to translate business requirements into scalable ML solutions

Tech: Python | TensorFlow | NLP | Transformers | Machine Learning | Ensemble Models

Compit

Data Scientist

December 2019 - May 2020 (6 months)

Nes Ziona

Worked on data engineering and machine learning tasks to integrate multiple data sources and extract insights from structured datasets.

- Implemented a data pipeline on AWS to integrate and process data from multiple sources
- Built clustering models using SciPy and scikit-learn to identify patterns in structured data
- Performed data preprocessing and feature engineering to improve model performance

Tech: Python | AWS | SciPy | scikit-learn | Data Pipelines | Machine Learning

Credit Agricole

Data Officer

September 2018 - September 2019 (1 year 1 month)

Paris

Worked on financial data analysis and automation to support portfolio risk monitoring for investment funds.

- Analyzed trading and portfolio data to monitor risk exposure across investment funds
- Automated portfolio risk analysis and reporting using SQL and VBA
- Developed data queries and tools to improve efficiency of financial data processing

Tech: SQL | VBA | Financial Data Analysis | Risk Analysis

Restominute

Founder

January 2016 - December 2016 (1 year)

Région de Paris, France

- Managed a team of three developers to develop the app.
- Created the business plan for the project.
- Promoted the project to events and clients.

Venga SAS

Data Analyst Intern

May 2016 - September 2016 (5 months)

Région de Paris, France

Start up, application: student social network and administrative management

- Centralised, analysed, monitored new sales opportunities
- Helped build the business case solution

Supervisor : Kevin Attal

Education

Université Panthéon Assas (Paris II)

Msc Economics · (2017 - 2019)

University of Michigan

Inferential Statistics with Python, Statistiques · (2020)

Saint-Cyr Officer Military School

MILITARY LEADERSHIP AND MANAGEMENT TRAINING · (2019 - 2019)

Sorbonne Universités

Graduate Degree, Entrepreneuriat / études entrepreneuriales · (2016 - 2017)

Sorbonne University

Bachelor of Science - BS · (2013 - 2016)
